Bringing together for the first time distinguished Gulf experts to analyse the renewed geo-economic prominence of the Gulf states, this volume investigates some of the 'new power brokers' in the world economy: the oil-exporting states of the Gulf. The Gulf Cooperation Council's (GCC) members: Bahrain, Kuwait, Oman, Qatar, the United Arab Emirates and Saudi Arabia, collectively have the largest proven oil reserves in the world and are among the world's largest oil-exporting states. Gulf Arab states are actively pursuing a variety of foreign investment strategies. Some of these investments are being managed by sovereign wealth funds, government investment corporations, and government-controlled companies. This renewed geo-economic status has received a lot of media attention but there has been a dearth of academic study on what this shift in global economic power means for the international economic system. This volume aims to fill this gap with a rigorous scholarly analysis based on primary sources and raw economic data. It brings together the expertise of academics who have devoted their career to careful study of the region and of renowned scholars of international political economy.
