Introduction to Plasma Physics and Controlled Fusion: Volume 1: Plasma Physics

Francis F. Chen

Introduction to Plasma Physics and Controlled Fusion: Volume 1: Plasma Physics Francis F. Chen
TO THE SECOND EDITION In the nine years since this book was first written, rapid progress has been made scientifically in nuclear fusion, space physics, and nonlinear plasma theory. At the same time, the energy shortage on the one hand and the exploration of Jupiter and Saturn on the other have increased the national awareness of the important applications of plasma physics to energy production and to the understanding of our space environment. In magnetic confinement fusion, this period has seen the attainment of a Lawson number nTE of 2×10^{21} cm⁻³ sec in the Alcator tokamaks at MIT; neutral-beam heating of the PL T tokamak at Princeton to $KTi = 6.5$ keV; increase of average β to 3%-5% in tokamaks at Oak Ridge and General Atomic; and the stabilization of mirror-confined plasmas at Livermore, together with injection of ion current to near field-reversal conditions in the 2XIII β device. Invention of the tandem mirror has given magnetic confinement a new and exciting dimension. New ideas have emerged, such as the compact torus, surface-field devices, and the EBT mirror-torus hybrid, and some old ideas, such as the stellarator and the reversed-field pinch, have been revived. Radiofrequency heating has become a new star with its promise of dc current drive. Perhaps most importantly, great progress has been made in the understanding of the MHD behavior of toroidal plasmas: tearing modes, magnetic VII VIII islands, and disruptions.

From reader reviews:

Norman Eiland:

What do you consider book? It is just for students as they are still students or the idea for all people in the world, what the best subject for that? Simply you can be answered for that query above. Every person has several personality and hobby for each and every other. Don't to be pressured someone or something that they don't would like do that. You must know how great as well as important the book Introduction to Plasma Physics and Controlled Fusion: Volume 1: Plasma Physics. All type of book can you see on many options. You can look for the internet solutions or other social media.

Nancy Hedrick:

Spent a free time and energy to be fun activity to perform! A lot of people spent their spare time with their family, or all their friends. Usually they carrying out activity like watching television, about to beach, or picnic within the park. They actually doing same thing every week. Do you feel it? Do you need to something different to fill your current free time/ holiday? Could possibly be reading a book might be option to fill your no cost time/ holiday. The first thing you ask may be what kinds of e-book that you should read. If you want to test look for book, may be the book untitled Introduction to Plasma Physics and Controlled Fusion: Volume 1: Plasma Physics can be excellent book to read. May be it might be best activity to you.

Lanell Sessions:

Introduction to Plasma Physics and Controlled Fusion: Volume 1: Plasma Physics can be one of your beginner books that are good idea. Most of us recommend that straight away because this publication has good vocabulary which could increase your knowledge in vocab, easy to understand, bit entertaining but nevertheless delivering the information. The author giving his/her effort to put every word into enjoyment arrangement in writing Introduction to Plasma Physics and Controlled Fusion: Volume 1: Plasma Physics however doesn't forget the main stage, giving the reader the hottest and based confirm resource facts that maybe you can be considered one of it. This great information can easily drawn you into new stage of crucial considering.

Hye Elliott:

What is your hobby? Have you heard that will question when you got pupils? We believe that that issue was given by teacher to the students. Many kinds of hobby, Everyone has different hobby. And also you know that little person including reading or as examining become their hobby. You have to know that reading is very important as well as book as to be the matter. Book is important thing to provide you knowledge, except your teacher or lecturer. You see good news or update with regards to something by book. Amount types of books that can you take to be your object. One of them is niagra Introduction to Plasma Physics and Controlled Fusion: Volume 1: Plasma Physics.
