Baby powder. It has a smell we link to content infants napping in their bassinets. However, babies are not the only use of baby powder. In fact, there are a number of uses for baby powder that have nothing whatsoever to do with a lovely child. Baby powder is composed of talc, a mineral with interesting properties. It occurs naturally in such deposits as soapstone, which has a high talc content. Talc, in its loose form, is called Talcum powder. Talcum powder is used in many industries such as paper making, plastic, paint, rubber, and cosmetics. It's quite a versatile substance. In fact, there are dozens of uses for talcum powder. Just one of them is in baby powder. We've gathered a number of uses for baby powder for around the house as well as for on your person together for you here. The uses range from cleaning and restoration of furniture items, antiques and clothes. Baby powder can also be used for its ability to decrease friction and get out of slippery situations, plus so much more.
