Smart Card Research and Advanced Applications: IFIP TC8 / WG8.8 Fourth Working Conference on Smart Card Research and Advanced Applications September ... in Information and Communication Technology)

Smart cards or IC cards offer a huge potential for information processing purposes. The portability and processing power of IC cards allow for highly secure conditional access and reliable distributed information processing. IC cards that can perform highly sophisticated cryptographic computations are already available. Their application in the financial services and telecom industries are well known. But the potential of IC cards go well beyond that. Their applicability in mainstream Information Technology and the Networked Economy is limited mainly by our imagination; the information processing power that can be gained by using IC cards remains as yet mostly untapped and is not well understood. Here lies a vast uncovered research area which we are only beginning to assess, and which will have a great impact on the eventual success of the technology. The research challenges range from electrical engineering on the hardware side to tailor-made cryptographic applications on the software side, and their synergies.

This volume comprises the proceedings of the Fourth Working Conference on Smart Card Research and Advanced Applications (CARDIS 2000), which was sponsored by the International Federation for Information Processing (IFIP) and held at the Hewlett-Packard Labs in the United Kingdom in September 2000.

CARDIS conferences are unique in that they bring together researchers who are active in all aspects of design of IC cards and related devices and environments, thus stimulating synergy between different research communities from both academia and industry. This volume presents the latest advances in smart card research and applications, and will be essential reading for smart card developers, smart card application developers, and computer science researchers involved in computer architecture, computer security, and cryptography.

From reader reviews:

Shannon Harvey:

Reading a reserve can be one of a lot of activity that everyone in the world loves. Do you like reading book therefore. There are a lot of reasons why people like it. First reading a e-book will give you a lot of new details. When you read a reserve you will get new information simply because book is one of many ways to share the information or their idea. Second, examining a book will make you actually more imaginative. When you reading a book especially fictional book the author will bring you to definitely imagine the story how the personas do it anything. Third, you can share your knowledge to some others. When you read this Smart Card Research and Advanced Applications: IFIP TC8 / WG8.8 Fourth Working Conference on Smart Card Research and Advanced Applications September ... in Information and Communication Technology), you can tells your family, friends along with soon about yours guide. Your knowledge can inspire different ones, make them reading a guide.

Tod Espitia:

You can find this Smart Card Research and Advanced Applications: IFIP TC8 / WG8.8 Fourth Working Conference on Smart Card Research and Advanced Applications September ... in Information and Communication Technology) by check out the bookstore or Mall. Just simply viewing or reviewing it might to be your solve trouble if you get difficulties for ones knowledge. Kinds of this reserve are various. Not only through written or printed but can you enjoy this book by simply e-book. In the modern era including now, you just looking of your mobile phone and searching what their problem. Right now, choose your own ways to get more information about your reserve. It is most important to arrange yourself to make your knowledge are still upgrade. Let's try to choose suitable ways for you.

Ellis Dunn:

As a pupil exactly feel bored to help reading. If their teacher expected them to go to the library as well as to make summary for some e-book, they are complained. Just tiny students that has reading's heart and soul or real their leisure activity. They just do what the educator want, like asked to go to the library. They go to presently there but nothing reading very seriously. Any students feel that reading through is not important, boring and can't see colorful images on there. Yeah, it is to get complicated. Book is very important in your case. As we know that on this time, many ways to get whatever we wish. Likewise word says, many ways to reach Chinese's country. Therefore , this Smart Card Research and Advanced Applications: IFIP TC8 / WG8.8 Fourth Working Conference on Smart Card Research and Advanced Applications September ... in Information and Communication Technology) can make you sense more interested to read.

Rachel Cady:

Reserve is one of source of knowledge. We can add our understanding from it. Not only for students but

native or citizen need book to know the up-date information of year for you to year. As we know those publications have many advantages. Beside we add our knowledge, can bring us to around the world. By the book Smart Card Research and Advanced Applications: IFIP TC8 / WG8.8 Fourth Working Conference on Smart Card Research and Advanced Applications September ... in Information and Communication Technology) we can take more advantage. Don't that you be creative people? For being creative person must prefer to read a book. Merely choose the best book that suited with your aim. Don't always be doubt to change your life with this book Smart Card Research and Advanced Applications: IFIP TC8 / WG8.8 Fourth Working Conference on Smart Card Research and Advanced Applications September ... in Information and Communication Technology). You can more attractive than now.
