The Dirt Cure: Growing Healthy Kids with Food Straight from Soil Maya Shetreat-Klein MD

In the tradition of Michael Pollan, Mark Hyman, and Andrew Weil, pioneering integrative pediatric neurologist Maya Shetreat-Klein, MD, reveals the shocking contents of children's food, how it's seriously harming their bodies and brains, and what we can do about it. And she presents the first nutritional plan for getting and keeping children healthy—a plan that any family can follow.

New alarming studies show the dramatic rise of chronic disease in children—from allergies and ADHD to mental illnesses and obesity. A traditionally trained pediatric neurologist and a parent herself, Dr. Maya encountered the limits of conventional medicine when her son suffered a severe episode of asthma on his first birthday and began a backward slide in his development. Treatments failed to reverse his condition, so Dr. Maya embarked on a scientific investigation, discovering that food was at the root of her son's illness, affecting his digestive system, immune system, and brain. The solution was shockingly simple: Heal the food, heal the gut, heal the brain...and heal the child.

Recent changes in growing and processing food harm kids' gut microbiomes, immune systems, and brains, contributing to chronic disease. Dr. Maya's plan started with the soil, using fresh foods and nature to heal her son from the inside out and the outside in. Since then, she's successfully helped chronically ill patients from around the world. Revealing the profound connections between food, nature, and children's health, Dr. Maya explains how food is constantly changing kids' bodies, brains, and even genes—for better or for worse. She also shares success stories from her practice and tips as a working mother of three on stocking healing foods (from veggies to chocolate!), reading labels, and getting even picky eaters into the new menu. This paradigm-shifting book empowers you to transform your child's health through food and ensure the long-term wellbeing of your kids and the entire family.

Fernando Rowe:

Are you kind of active person, only have 10 or even 15 minute in your moment to upgrading your mind talent or thinking skill even analytical thinking? Then you have problem with the book compared to can satisfy your short time to read it because all of this time you only find book that need more time to be go through. The Dirt Cure: Growing Healthy Kids with Food Straight from Soil can be your answer because it can be read by a person who have those short spare time problems.

Pamela Dudley:

As a university student exactly feel bored to be able to reading. If their teacher inquired them to go to the library or to make summary for some book, they are complained. Just little students that has reading's spirit or real their passion. They just do what the educator want, like asked to go to the library. They go to at this time there but nothing reading really. Any students feel that looking at is not important, boring and also can't see colorful pics on there. Yeah, it is being complicated. Book is very important in your case. As we know that on this era, many ways to get whatever we would like. Likewise word says, ways to reach Chinese's country. So , this The Dirt Cure: Growing Healthy Kids with Food Straight from Soil can make you truly feel more interested to read.

Zachary Connors:

What is your hobby? Have you heard that question when you got pupils? We believe that that issue was given by teacher to the students. Many kinds of hobby, Everyone has different hobby. So you know that little person including reading or as reading become their hobby. You must know that reading is very important along with book as to be the matter. Book is important thing to provide you knowledge, except your teacher or lecturer. You will find good news or update regarding something by book. Different categories of books that can you choose to use be your object. One of them is this The Dirt Cure: Growing Healthy Kids with Food Straight from Soil.
