Algebraic and Combinatorial Aspects of Tropical Geometry (Contemporary Mathematics) Erwan Brugallé, Mariá Angélica Cueto, Alicia Dickenstein, Eva-Maria Feichtner, Ilia Itenberg
This volume contains the proceedings of the CIEM workshop on Tropical Geometry, held December 12-16, 2011, at the International Centre for Mathematical Meetings (CIEM), Castro Urdiales, Spain. Tropical geometry is a new and rapidly developing field of mathematics which has deep connections with various areas of mathematics and physics, such as algebraic geometry, symplectic geometry, complex analysis, dynamical systems, combinatorics, statistical physics, and string theory. As reflected by the content of this volume, this meeting was mainly focused on the geometric side of the tropical world with an emphasis on relations between tropical geometry, algebraic geometry, and combinatorics. This volume provides an overview of current trends concerning algebraic and combinatorial aspects of tropical geometry through eleven papers combining expository parts and development of modern techniques and tools.

---

From reader reviews:

Shawn Hodgin:

Playing with family in the park, coming to see the marine world or hanging out with pals is thing that usually you have done when you have spare time, subsequently why you don't try matter that really opposite from that. One activity that make you not experience tired but still relaxing, trilling like on roller coaster you have been ride on and with addition of information. Even you love Algebraic and Combinatorial Aspects of Tropical Geometry (Contemporary Mathematics), you can enjoy both. It is good combination right, you still would like to miss it? What kind of hangout type is it? Oh come on its mind hangout folks. What? Still don't buy it, oh come on its named reading friends.

Allen Ellis:

Reading a book for being new life style in this 12 months; every people loves to read a book. When you learn a book you can get a great deal of benefit. When you read books, you can improve your knowledge, due to the fact book has a lot of information onto it. The information that you will get depend on what sorts of book that you have read. If you want to get information about your research, you can read education books, but if you want to entertain yourself you are able to a fiction books, this kind of us novel, comics, and soon. The Algebraic and Combinatorial Aspects of Tropical Geometry (Contemporary Mathematics) will give you new experience in looking at a book.

Bryan Lopez:

In this period globalization it is important to someone to obtain information. The information will make anyone to understand the condition of the world. The condition of the world makes the information easier to share. You can find a lot of references to get information example: internet, newspapers, book, and soon. You will see that now, a lot of publisher that will print many kinds of book. The actual book that recommended for your requirements is Algebraic and Combinatorial Aspects of Tropical Geometry (Contemporary Mathematics) this reserve consist a lot of the information of the condition of this world now. That book was represented how do the world has grown up. The words styles that writer use for explain it is easy to understand. The writer made some analysis when he makes this book. That's why this book appropriate all of you.

Dawn Nelson:

Is it you actually who having spare time in that case spend it whole day by watching television programs or just resting on the bed? Do you need something totally new? This Algebraic and Combinatorial Aspects of Tropical Geometry (Contemporary Mathematics) can be the solution, oh how comes? A fresh book you know. You are thus out of date, spending your spare time by reading in this completely new era is common not a nerd activity. So what these guides have than the others?
