Feline Soft Tissue and General Surgery, 1e

While the practice of feline general and oncologic surgery has developed greatly in recent years, the option of referral for some cat owners is not always a viable one. The increasing requirement for the general veterinarian to be competent in performing feline surgery has not, however, been supported by a dedicated text on the subject. *Feline General and Oncological Surgery* assembles an international team of editors and contributors to present the first comprehensive resource devoted solely to all aspects of soft-tissue surgeries in the cat. Techniques are covered in a practical and detailed 'how to' manner and range from the common to the more specialized, ensuring the widest possible appeal.

The book divides into several sections, initially considering the general approach to the feline surgery patient and then proceeding to detailed coverage of surgery by anatomic location. Part 1 deals with the basics of feline anesthesia, analgesia, preoperative and postoperative care of the patient, surgical instrumentation and surgical principles for oncology cases. Part 2 covers surgical techniques of general and oncological feline diseases and injuries, which are explained as step-by-step methods with many specially prepared schematic illustrations specific to the cat. Emphasis is on presenting both classical methods and new techniques.

Feline Soft Tissue and General Surgery is the perfect sister-text to *Feline Orthopedic Surgery and Musculoskeletal Disease*, also published by Elsevier. Together they comprise a comprehensive and complete literature giving practical coverage of all possible surgical procedures in the cat.

- The first feline-specific book on soft-tissue surgery in the cat
- Comprehensively addresses all surgeries currently practicable
- Contains clear descriptions of techniques accompanied by wide-ranging, full-color illustrations
- Presents an authoritative collaboration of editors and contributors of international reputation and authority

Trudy Clark:

Reading a book to be new life style in this calendar year; every people loves to read a book. When you study a book you can get a lot of benefit. When you read books, you can improve your knowledge, due to the fact book has a lot of information into it. The information that you will get depend on what forms of book that you have read. If you need to get information about your study, you can read education books, but if you want to entertain yourself you are able to a fiction books, such us novel, comics, and soon. The Feline Soft Tissue and General Surgery, 1e will give you new experience in examining a book.

Anne Young:

As a student exactly feel bored to be able to reading. If their teacher expected them to go to the library or to make summary for some book, they are complained. Just tiny students that has reading's soul or real their leisure activity. They just do what the instructor want, like asked to go to the library. They go to there but nothing reading significantly. Any students feel that studying is not important, boring as well as can't see colorful pictures on there. Yeah, it is being complicated. Book is very important in your case. As we know that on this era, many ways to get whatever we would like. Likewise word says, many ways to reach Chinese's country. Therefore , this Feline Soft Tissue and General Surgery, 1e can make you truly feel more interested to read.
