The Mathematical Education of Teachers II (Cbms Issues in Mathematics Education) American Mathematical Society

This report is a resource for those who teach mathematics and statistics to PreK-12 mathematics teachers, both future teachers and those who already teach in our nation's schools. The report makes recommendations for the mathematics that teachers should know and how they should come to know that mathematics. It urges greater involvement of mathematicians and statisticians in teacher education so that the nation's mathematics teachers have the knowledge, skills, and dispositions needed to provide students with a mathematics education that ensures high school graduates are college- and career-ready as envisioned by the Common Core State Standards. This report draws on the experience and knowledge of the past decade to: Update the 2001 Mathematical Education of Teachers report's recommendations for the mathematical preparation of teachers at all grade levels: elementary, middle, and high school. Address the professional development of teachers of mathematics. Discuss the mathematical knowledge needed by teachers at different grade levels and by others who teach mathematics such as elementary mathematics specialists, special education teachers, and early childhood educators. Each of the MET II writers is a mathematician, statistician, or mathematics educator with substantial expertise and experience in mathematics education. Among them are principal investigators for Math Science Partnerships as well as past presidents and chairs of the American Statistical Association, Association of Mathematics Teacher Educators, Association of State Supervisors of Mathematics, Conference Board of the Mathematical Sciences, and National Council of Teachers of Mathematics. The audience for this report includes all who teach mathematics to teachers--mathematicians, statisticians, and mathematics educators--and all who are responsible for the mathematical education of teachers--department chairs, educational administrators, and policy-makers at the national, state, school-district, and collegiate levels. This series is published in cooperation with the Mathematical Association of America.

From reader reviews:

Dennis Scott:

Why don't make it to be your habit? Right now, try to prepare your time to do the important take action, like looking for your favorite reserve and reading a guide. Beside you can solve your long lasting problem; you can add your knowledge by the publication entitled The Mathematical Education of Teachers II (Cbms Issues in Mathematics Education). Try to face the book The Mathematical Education of Teachers II (Cbms Issues in Mathematics Education) as your buddy. It means that it can for being your friend when you really feel alone and beside those of course make you smarter than in the past. Yeah, it is very fortunated for you. The book makes you considerably more confidence because you can know every little thing by the book. So , we should make new experience and also knowledge with this book.

Rose Rowe:

The book with title The Mathematical Education of Teachers II (Cbms Issues in Mathematics Education) possesses a lot of information that you can learn it. You can get a lot of profit after read this book. This specific book exist new expertise the information that exist in this guide represented the condition of the world right now. That is important to yo7u to find out how the improvement of the world. That book will bring you throughout new era of the syndication. You can read the e-book on your own smart phone, so you can read the item anywhere you want.

Margaret Burman:

The book untitled The Mathematical Education of Teachers II (Cbms Issues in Mathematics Education) contain a lot of information on the idea. The writer explains your ex idea with easy means. The language is very straightforward all the people, so do not really worry, you can easy to read the idea. The book was compiled by famous author. The author brings you in the new period of time of literary works. You can actually read this book because you can continue reading your smart phone, or product, so you can read the book inside anywhere and anytime. In a situation you wish to purchase the e-book, you can open their official web-site in addition to order it. Have a nice learn.

Allie Littlefield:

Reading a e-book make you to get more knowledge from it. You can take knowledge and information from the book. Book is prepared or printed or created from each source that filled update of news. Within this modern era like now, many ways to get information are available for an individual. From media social similar to newspaper, magazines, science reserve, encyclopedia, reference book, book and comic. You can add your understanding by that book. Do you want to spend your spare time to spread out your book? Or just seeking the The Mathematical Education of Teachers II (Cbms Issues in Mathematics Education) when you necessary it?
